## INTRODUCTION.

---

 HIS Catalogue, which has been compiled with the personal assistance of Mr. Seymour Haden, is based upon a Collection formed by the Editor; but it includes a description of all the plates—finished, unfinished, or in progress—which are known to have been produced by Mr. Haden up to this date.

The Catalogue does not purport to be in any degree whatever critical, but merely to furnish such detailed descriptions of the Etchings, their “Trial Proofs” and “States,” as will suffice for a ready identification of them.

So far as can be ascertained, the total number of plates etched by Mr. Haden since he commenced in 1843 have been 184, produced in the following years :—

The first Catalogue of Mr. Haden's Etched Work appeared in 1864 in the "Gazette des Beaux Arts," appended to an article written by M. Philippe Burty, vide "*Gazette des Beaux Arts*," *First Series*, vol. xvii., pp. 280, 357. In that Catalogue there are descriptions of 54 of the etchings which had, at that time, been produced.

The 54 etchings are there described in the following order :—

In 1865-6 a selection of 25 etchings (exclusive of "head" and "tail" pieces) was published under the title of "*Etudes à l'eau forte*,"† and in that work

\* This plate was, with the only impression taken from it, destroyed.

† The "*Etudes à l'eau forte*" were issued, half in 1865 and the remainder (with some textual alterations) in 1866. It was originally announced that 250 sets would be published, but, as a matter of fact, 180 only were completed, owing to several of the more delicate plates failing. There is therefore a residue of impressions yet to be taken of certain of the plates composing the work.

the Catalogue which had appeared in the "Gazette des Beaux Arts," was reprinted, omitting Nos. 30, 36, 43 and 52, but with the following additions :—

Nos. in this Catalogue.	Nos. in "Etudes" Catalogue.	
67	51	The Towing Path
65	52	Kew Railway Extension

83	54	Sunset on the Thames

Before attention is called to the arrangement adopted in the present Catalogue, the Editor desires to explain the view which Mr. Haden has submitted to him as correctly defining the term "Trial Proof" as distinguished from "State," a view which, if generally adopted, would simplify the confusion that exists in the use of those terms as descriptions of impressions taken from a plate in its different stages.

"Trial" or "Artist's Proofs," as at one time they were properly called, are the impressions (generally very limited in number) taken, from time to time, from a plate while it is in progress, for the information and correction of the artist, and answer to the proofs and revises of a literary work in its passage through the press.

“States” on the contrary refer to finished or published plates, the “First State” of which is the technical equivalent to the “first edition” of a book.

New “States” result from variations made in the finished plate by its being re-worked, either because it has ceased to give clear impressions, or because the artist, during the progress of printing, desires to vary the effect of the etching. This re-working on a completed plate constitutes a “Second,” or, as the case may be, a “Third State” (or edition), and so on.

The arrangement which the Editor has adopted is chronological, and the plates are described in the following manner:—

1. The Number of the plate in the order of its production.
2. The Title by which the etching is generally known.
3. The Dimensions of the plate, with the addition of **E.**, **E. D.**, or **D.**, to distinguish whether it is a pure Etching, Etching combined with Drypoint, or Drypoint only.
4. Such a short General Description of the subject as is necessary for the identification of the plate.
5. A description of the “Trial Proofs.”
6. A description of the finished or “Published States” of the plate.

The word and letters "Coll. H." or "Coll. D.," where introduced after the description of a Trial Proof, signify that an impression is in Mr. Haden's or in the Editor's Collection, or in both, as the case may be.

A number of the plates described in the following pages still exist (where they are destroyed or lost the fact is mentioned), and probably from some of them, further impressions may be taken in the condition described. In other cases, however, the completed plates may be varied so as to enter into new states, or plates which are not yet finished, may be completed and published. Thus impressions will, no doubt, hereafter come into the market, in conditions *not* described in this Catalogue. If, however, Collectors bear in mind that which is now stated, they will probably find little, if any, practical difficulty in identifying the impressions referred to, with the plates mentioned in this Catalogue, although in conditions not now existing, and therefore not here described, particularly as no alteration will be made in the size of those plates.

The Editor has taken great pains to make this Catalogue perfect; but although, as previously stated, he has had the invaluable assistance of the artist in its compilation, he cannot hope to have avoided error, as

regards especially the existence of trial proofs, which, unknown to him or forgotten by Mr. Haden, are not mentioned; he will, therefore, esteem it a favour if owners of undescribed impressions will kindly communicate with him, so that the omission may hereafter be supplied.
